Application Story

Advantech's DTOS Partnership Made Functioning Prototype of ETX Solution Possible in 12 weeks (SOM-4472)

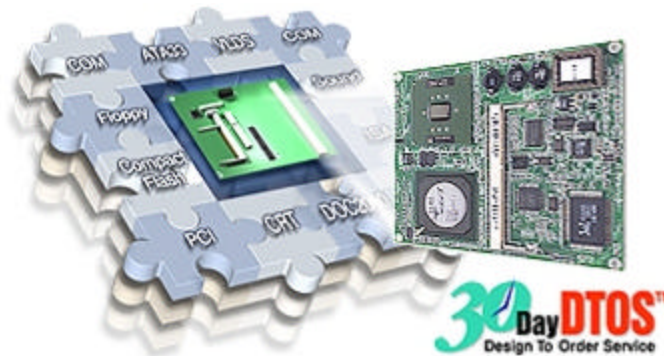

Smiths Heimann Biometrics GmbH (SHB) is located in Jena, Germany, where it develops and manufactures biometric systems for the security industry. For the development of a new product family, they needed a solid system platform. Advantech and its DTOS partner, MarekMicro, had the solution. MarekMicro was the first company in Europe to join Advantech's DTOS partner program in March 2002, and has since developed customer specific solutions based on Advantech's ETX System-On-Modules.
