About Advantech

Advantech, Enabling an Intelligent Planet

Founded in 1983, Advantech is a leader in providing trusted innovative embedded and automation products and solutions. Advantech offers comprehensive system integration, hardware, software, customer-centric design services, and global logistics support; all backed by industry-leading front and back office e-business solutions. We cooperate closely with our partners to help provide complete solutions for a wide array of applications across a diverse range of industries. Advantech has always been an innovator in the development and manufacture of high-quality, high-performance computing platforms, and our mission is to empower these innovations by offering trustworthy products and services that enable an intelligent planet. With Advantech, there is no limit to the applications and innovations our products make possible.

Advantech Global Services

Advantech has over 12 regional hotlines and offices throughout 91 cities, in 20 countries, with nearly 6,000 employees to provide efficient, professional services for customer care, product selection, technical support, and order handling. Through our call centers and online stores, customers worldwide enjoy the convenience of Advantech's multi-service channels to reduce business turnaround time. Together with the four customer service centers in Taiwan, China, Europe and the United States, our global service network offers an extensive spectrum of services that includes warehousing, logistics, peripheral certification, sourcing & purchasing, and RMA & value-added services, and technical support & training.

Panel PC Introduction

Advantech Panel PCs open up new opportunities by integrating computers with industries and applications; they bring computing to places and applications never imagined before. Their slim profiles, comprehensive functionality, high brightness LCDs, and user-friendly touchscreens make them the ideal solution for operator panels, information terminals, ecommerce terminals and human-machine interfaces. Producing high-quality industrial products is Advantech's specialty. Our Panel PCs are built to survive unforgiving environments, such as factory automation facilities, production control points, warehouses and distribution centers, transportation control centers, stations, airports and even refrigerated environments. As an ISO-9001 and ISO-14000 certified organization, Advantech abides by strict quality control standards applied to design, production and shipment. Panel PCs are subject to extensive testing prior to product release including EMI, EMC, temperature and vibration testing, and exposure to dust and liquids.

Multi-function Panel PC

- High computing power
- Multiple I/O
- AC power-in
- PCI/PCle Expansion

Fanless Panel PC

- Slim
- Fanless
- Low power consumption
- Wide range DC-input
- PCI/PCle expansion

Installation Accessories

- Multiple standard mounting options
 - Desktop stand
 - Arm
 - Wall mount
 - Panel mount

Key Features of Panel PCs

Panel PCs offer customers unique features for specific application needs.

Customers can choose CPU, operating system, LCD, touchscreen and sunlight readable features. All the best standard and customized solutions are available for their applications.

- 3rd Gen Intel® Core™ i
- Intel® Atom™ D2550

Most updated platform

PPCs focus on new CPU technology so that the customer can take advantage of better CPU computing / graphic performance and even lower power consumption. With the most updated platform, customer can get the best cost effective products.

Full Range LCD

Advantech panel PCs provide a wide range of panel size options from 6.5 to 17 TFT LCD , and also 15.6/18.5/21.5 in widescreen format.

Auto Dimming

Ambient light may change throughout the day. With an auto-dimming function, the backlight is adjusted automatically by sensing environmental light level. Not only making operating them more comfortable, but also saving more power.

LED Indicators

Most customers embed PPCs and it's important to identify the system status from the front bezel LED. It displays the power on / off status, storage being accessed and Ethernet transfer status. With the user friendly LED indicator, you can easily check if any issues occur on your systems.

IP65 Front Panel

With advanced mechanical design, we provide the an IP65 grade dustproof and waterproof front bezel. It protects the PPC in harsh environments and keeps it operating.

IP65 Compliant

Spill & Dust Resistant

SUSIAccess support

With SUSIAccess, providing customers with remote devices monitoring, switch machines, desktop connection, system recovery and system protection features and so on that help customers to multiple clients through a single console for remote device management. The services are also designed to be cloud-based. It provides on-demand software services so SIs can download & upgrade applications when they need.

Key Features of Panel PCs

Excellent Extensibility Expansion

To use in different scenarios, PPCs provide multiple options on miniPCIe, PCI and PCIe x1 standard expansions cards. Through this flexible design, customers can add on field bus cards to communicate with their own devices.

Dual 2.5" HDD with RAID Support

The Dual HDD design provides Intel RAID 0/1 to ensure data protection and help customers easily recover from a crashed system.

Support Dual HDD with Intel RAID

One isolated RS-232/422/485 Port (Selectable by BIOS)

Isolation

To enhance system reliability, isolation prevents irregular power and avoids system crashes caused by voltage spikes from devices connected through RS-232/422/485.

Key Benefits for Your Systems

ADVANTECH CTOS

Configure To Order Services

Configure To Order Service (CTOS)

With an optimized and modular design, it's never been easier to meet customer's varied requirements. CTOS provides a great value added service to save customer's time and money on system configuration.

Fully supported customization services

Although 'off-the-shelf' PPCs provide an excellent array of features, customers' needs are unlimited. With our quick and efficient R&D capabilities we provide a customization service from mechanical modification, software image distribution, I/O adjustment and so on. The benefit to customers is that they get more unique products to fulfill different applications.

Cost-effective

The PPC focuses on the machine builder and industrial process monitoring market. By adopting the most up-to-date technology and optimized mechanical design PPCs provide you with the best combination of cost versus performance products to fit your integration needs. However, system reliability is never sacrificed and a PPC is always your best choice.

Monitoring & Process Control

Machine automation is a system that tracks and adjusts resource usage as needed. Automated monitoring and process control in production cycles improves efficiency and productivity. Predictive process control involves the ability to monitor and control a continuous material process in real time. This allows the conditions of the process to be quickly and responsively adjusted, and avoids the delays associated with monitoring the final product. A hierarchy of LANs has also emerged, ranging from general to the more specialized, and from Ethernet to FDDI systems, each with its own specific usage. The data handled is more than just a control data, it also includes a variety of operational and processing data, seeking to establish comprehensive systems that embrace both data systems and control systems. It will be necessary to interconnect a variety of support systems (engineering support, operational support, diagnostic support, maintenance support, software development support, etc.) so as to form a data and control system capable of optimizing manufacturing throughout the plant. Client-server configurations are now being used for the functions.

Why Panel PC's?

Panel PC's compact design and multi I/O have expanded possibilities for control of devices by offering a central control platform. Panel PCs are used in monitoring system conditions and administration. Process monitoring, process control, automation, real-time operator interface and display, on-line analysis and networking are all parts of their functionality.

1. User-friendly interface

The user-friendly touchscreen has an improved interface, and enables the operator to remotely control each device.

2. High reliability and maintainability

Industrial grade Panel PC's provide high levels of reliability, ease of continuous operation and maintenance.

3. Flexible system configuration

Panel PC's for monitoring & process control can interconnect with business computer systems, plant controllers, design systems, and a variety of other systems. The full set of network functions and multi-I/O can be flexibly configured.

Computerized Operating Systems

Panel PCs can be used in any system that needs an operating interface for information input, display monitoring or preview, data storage and retrieval; as well as network connectivity to a LAN or WAN via wired or wireless connection. Panel PC interfaces act as operating centers for systems. Multifunction products such as all-in-one printer/fax/copier/scanners are getting more complicated and versatile, requiring a PC-like appliance to control the system more efficiently; this is a key role for a Panel PC. Operators can input commands and preview content through a Panel PC. Revisions can be made before formal printing and copies can be permanently stored on servers through an Ethernet connection.

Why Panel PC's?

1. Flexible installation

Panel PC's offer various installation options (wall-mount, panel-mount, rail-mount, swing-arm, stand, etc.) to meet any customer requirement.

2. Intuitive operation with touchscreen

Compared with keyboards & mice, touchscreens are a more convenient operating interface. With different environments or requirements, Panel PC's offer different technologies like: Resistive, Capacitive or SAW (Surface Acoustic Wave) touchscreens.

3. Various I/O and expansion ports

Panel PC's provide various I/O ports like USB, parallel port, COM port and PCI/ISA slot. Customers can easily integrate Panel PC's with other devices.

PPC-L62T

6.5" Fanless Panel PC with Intel® Atom™ N455 Processor

Features

- 6.5" TFT VGA LCD (LED Backlight)
- Intel® Atom™ N455 CPU on board
- System memory up to 2GB DDR3 SDRAM
- One CFast socket
- Fanless design and compact size
- Aluminum front bezel
- Dual Gigabit LAN support
- Adjust RS-232/422/485 through BIOS
- Automatic data flow control over RS-485

Introduction

The PPC-L62T is a 6.5" industrial-grade Panel PC for compact applications for machine builders. The PPC-L62T is highly reliable because of its fanless design. The IP65 compliant aluminum front bezel provides excellent protection especially in harsh environments (water and dust). The Dual Gigabit LAN provides reliable communication between machine and control unit and the teaming function enhances fault tolerance and load balancing. PPC-L62T supports the most popular operating systems, such as Microsoft Windows XP, XP Embedded and Windows CE 6.0.

Introduction

PPC-3100 is a new 10.4" Panel PC equipped with an Intel Atom processor D2550. Meeting high demands of harsh environments, the fanless design makes PPC-3100 more reliable in different kinds of applications for the machine building industry. In addition, the dual GbE LAN, 4 x serial ports, 4 x USB ports, and GPIO connector make it easier to connect to devices and be integrated into specific solutions. With a user friendly design it comes with an LED indicator on the front panel for power on/off, storage access, and LAN active status.

PPC-L128T

**12.1" Fanless Panel PC with
Intel® Atom™ N270 Processor**

Features

- 12.1" TFT XGA LCD with optional resistive touchscreen
- Embedded Intel® Atom™ processor N270 1.6 GHz
- Supports up to 2 GB DDR2 SDRAM
- Supports one internal SATA 2.5" HDD
- Support 4 USB 2.0 ports, Dual Gigabit Ethernet
- Optional PCI/PCIe x 1 expansion kit
- Fanless and ultra-low power consumption
- Automatic data flow control over RS-485 (COM2)

Introduction

The PPC-L128T is 12.1" Fanless panel PC that delivers high performance while consuming low power. The PPC-L128T operates with low noise and provides display resolutions up to 1024 x 768 (XGA) pixels. The PPC-L128T is equipped with dual Gigabit Ethernet connectors supporting either failover or LAN teaming. Advantech's customization services and optional accessories including wireless modules, battery packs, and SATA optical devices, allowing system integrators to design tailor-made solutions for a host of industrial applications. And PPC-L128T optionally supports a sunlight readable display, making it suitable for outdoor use.

Introduction

The PPC-L157T is a 15" Fanless panel PC that delivers high performance while consuming low power. The PPC-L157T operates with low noise and provides display resolutions up to 1024 x 768 (XGA) pixels. The PPC-L157T is equipped with dual Gigabit Ethernet connectors supporting either failover or LAN teaming. Advantech's customization services and optional accessories including wireless modules, battery packs, and SATA optical devices, allow system integrators to design tailor-made solutions to a host of industrial applications.

PPC-125T

12" Panel PC with Intel® Core™2 Duo Processor

Features

- 12.1" TFT XGA (1024 x 768) LCD Panel
- Intel® Core™2 Duo processor up to 2.16 GHz
- System memory up to 4 GB (DDR2 200-pin SODIMM socket x 2)
- 1 x PCI slot or 1 x PCIe slot (both optional)
- One Mini PCIe slot
- Built-in CF card interface (IDE interface for OS booting)
- Two Gigabit Ethernet ports, support LAN teaming
- One RS-232/422/485; (supporting Auto-flow control, selecting by BIOS)

Introduction

The PPC-125T is an Intel Core 2 Duo based Panel PC with 12.1" color TFT LCD. It features multimedia devices, various connectors, and can be installed in virtually any application. In addition, its user-friendly interface makes it a great host for information appliances. Four serial COM supports auto-flow control PPC-125T advanced networking capabilities, and provides a great solution for versatile applications.

Protection

To meet the requirements of a public environment, the front panel PPC-125T complies with the IP65 protection standard. Furthermore, the watchdog timer and power management features make the system secure and stable. The onboard hardware monitoring feature provides an automatic protection function, which prevents the CPU from becoming overheated.

Expansion

To extend functionality, the PPC-125T is designed with either one expansion slot for PCI card or PCIe card and six USB 2.0 (Universal Serial Bus) ports. With these expansion capabilities, the PPC-125T not only functions as an HMI, but also as a computing center on which to build your applications.

Introduction

The PPC-6150 is a Panel PC with an Intel Core i3/i5 or Celeron processor, and a 15" color TFT LCD panel. It features extremely high computing power, modular design, excellent connectivity, and can support virtually any application. In addition, its user-friendly interface makes it a great host for information appliances. Two expansion slots, dual hard drives supporting Intel RAID, and one isolated RS-232/422/485 port make the PPC-6150 highly reliable, and provide a great solution for a wide range of applications.

Protection

To meet the requirements of a public environment, the front panel PPC-177T complies with the IP65 protection standard. Furthermore, the watchdog timer and power management features make the system secure and stable. The onboard hardware monitoring feature provides an automatic protection function, which prevents the CPU from becoming overheated.

Expansion

To extend functionality, the PPC-177T is designed with one PCI-e expansion Slot (PCI is available as option) and Four USB 2.0 (Universal Serial Bus) ports. With these expansion capabilities, the PPC-177T not only functions as an HMI, but also as a computing center on which to build your applications.

PPC-179T

17" Panel PC with Intel® Core™2 Duo Processor

Features

- 17" TFT SXGA LCD
- Intel® Core™2 Duo LGA775 Socket-based processor up to 3.0 GHz
- Supports 240-pin DDR3 1333/1066 DIMM x2 Up to 4 GB
- Rugged die-cast aluminum housing with removable plastic front bezel
- Supports One Mini PCIe socket, Dual Gigabit Ethernet
- One PCI and one PCIe expansion slot
- One RS-232/422/485; (supporting Auto-flow control, jumper-selected)

Introduction

PPC-179T is a top performing and highly expandable panel PC. Equipped with a 17" Color TFT LCD, it features high performance, multimedia devices, connectors, and 2 expansion sockets (PCI and PCIe) for high expansion capacity. Because of its multifunctional design, the PPC-179T meets demands from multimedia applications and interactive kiosks that require big displays and powerful computing performance.

Feature Details

Protection

The PPC-179T is robust enough to withstand harsh environments on factory floors and in an external environment. The die-cast housing also acts as a heat sink to prevent the system from overheating.

Networking

Four serial ports and dual 10/100/1000 Mbps Ethernet port give the PPC-179T advanced networking capabilities and provide the best solution for versatile applications.

Expansion

To extend its functionality, the PPC-179T is designed with two expansion slots for one PCI and one PCIe card, one Mini PCIe slot, six USB 2.0 (Universal Serial Bus) ports, four COM ports. With these expansion capabilities, the PPC-179T not only functions as an HMI, but also as a computing center around which to build your application.
