

# uCPE - Are You Ready for the Next Wave?

## FWA-T011

Intel® Celeron® or Pentium® N Series  
Slim CPE for cloud-based deployments

## FWA-1012VC

Intel® Atom™ Processor C3000  
Versatile platform for wide-scale deployments

## FWA-3050

Intel® Xeon® Processor D-2100  
Fully configurable to fit any enterprise deployment

## FWA-5070

Intel® Xeon® Scalable Processor  
Throughput and connectivity for the most demanding deployments

### CAPEX & OPEX Savings

Optimized designs with efficient power & cooling

### Maximum Scalability

Scale from small businesses to headquarters

### Flexible WAN Connectivity

Choice of hybrid LTE, Wi-Fi, xDSL & SFP+ configurations

### Advanced Security

Significant enhancements over pure IT solutions

### Reduced Deployment Risk

Proven NFV ecosystem interoperability

Advantech Networks & Communications Group

## Streamline Your uCPE & SD-WAN Rollouts

Market-driven Feature Set

World Class Reliability

Pre-configured HW+SW

Global Logistics Local Touch

Premium After Sales Services

## ADVANTECH

Sizing a uCPE to meet your price, performance and throughput goals can be costly and time-consuming. With WWT and Adva, connect to any of our **white-box uCPE platforms** on line, spin up an instance, and take a test-drive.

Connect your white box to other uCPEs around the world in locations served by WWT allowing you to build, test and fully validate your next generation network well ahead of commercial deployment.

## ADVA™

The **ADVA Ensemble Connector** is the industry leading pure-play NFV hosting platform.

As a truly open virtualization solution, it enables CSPs to avoid vendor lock-in and gives them the freedom to deploy best-in-class software for virtual network functions on a range of white box uCPEs including the Advantech FWA Series.

## World Wide Technology

WWT accelerates **Service Provider outcomes**, by **reducing the time it takes to evaluate, integrate and deploy new solutions at scale.**

WWT's **Advanced Technology Center (ATC)** allows customers and partners to collaborate in both a lab environment and remotely, via a secure user portal and a unique mobile app. Together with ADVA and Advantech, WWT enables partners to accelerate their uCPE and SD-WAN deployments over 5G, xDSL and WiFi.
